Everyone ought to know some Russian. Just as educated people once felt the need to know Latin, nowadays it is Russian which we cannot afford to ignore. Is Russian difficult? It is more of a challenge for an English-speaking learner than French or German, but much easier than Japanese or Arabic. Behind the exotic-looking alphabet, which is based on Greek, there is a simple system of pronunciation and a large number of familiar words, so come along and enjoy your journey into this important language!
